EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ken Fields on August 1st, 2nd and 3rd 2006.

Claims 1 and 15 are amended as follows.

Claim 1, An optical disc which is readable by a reproduction apparatus, the reproduction apparatus being operable to perform random access to moving image data in accordance with reproduction section information, the optical-disc storing:

the moving image data;

at least two pieces of the reproduction section information, wherein the two pieces of the reproduction information that specify a preceding reproduction section and a subsequent reproduction section on of the moving image data;

a duplicated part which is obtained, for a modification purpose, by duplicating an end vicinity of the preceding reproduction section and a beginning vicinity of the subsequent reproduction section; and

a flag, which is recognizable by the reproduction apparatus and if set to be on, indicates reproduction of a part before the end before the end vicinity and a part after the beginning vicinity via the duplicated part, and if set to be off, indicates sequential reproduction of the

preceding reproduction section and the subsequent reproduction section without via using the duplicated part.

Claim 15, An optical disc which is readable by a reproduction apparatus, the reproduction apparatus being operable to perform random access to moving image data in accordance with reproduction section information- the optical disc storing:

at least one piece of the moving image data;

a duplicated part obtained by duplicating a part of the moving image data; and

a flag,

wherein the duplicated part is to be modified, and

wherein the flag, which is recognizable by the reproduction apparatus, if set to be on, indicates reproduction of before and after the moving image data via the duplicated part, and if set to be off, indicates reproduction of the moving image data without via using the duplicated part.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a recording apparatus that performs an operation to specify a preceding reproduction section and a subsequent reproduction section from VOB through an interactive screen. Independent claims 1, 8, and 13 identify the uniquely distinct features "a duplicated part which is obtained, for a modification purpose, by duplicating an end vicinity of the preceding reproduction section and a beginning vicinity of subsequent reproduction section; and a flag, if set to be on, indicates reproduction of a part before the end vicinity and a part after the beginning vicinity via the duplicated part, and if set to be off, indicates sequential

reproduction of the preceding reproduction section and the subsequent reproduction section without via the duplicated part.” The closest prior art, Kajimoto (EP 0 847 055 A2) discloses managing a series of available storage areas of the storage medium, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

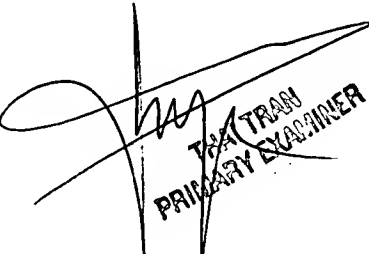

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
